

Audit Tracking System

ATS gives you self-auditing tools so you can maintain high operating standards

The power of ATS:

- Job Site Reviews
 - Quick reviews that identify positive findings and opportunities for improvement with photos of each item
 - Assign corrective actions based on findings
- Field Safety Reviews
 - A more detailed checklist covering hazard identification, work procedures, hazmat, work areas, vehicles, protective devices, etc
 - Each out-of-compliance item requires analysis & corrective actions
 - Assign number of required audits per week by auditor
 - Detailed reports including statistics for each checklist item, out of compliance items, auditor requirements, and quarterly analysis
- Create your own audit checklists and upload them into the system
 - Download our blank Excel template, add your own checklist items, then upload the completed audit into the system
 - The system imports your custom items and responses then allows you to assign corrective actions
